# Maintenance Guide

## CLEANING ACRYLIC

As a general rule, Acrylic will require some routine cleaning (every few months) to retain it's original luster. Pigmented colors do contain UV stabilizers to slow down natural fading due to exposure to harmful UV rays. Painted colors also contain UV inhibitors and will also lose some original luster when exposed in exterior applications. This "fading" will vary based on color and installation location, as the hot desert sun will fade most colors faster than exposure in more northern climates.

Routine cleaning of plastics and painted plastics is best performed by using warm, soapy water and a soft cloth or sponge. Based on the local atmosphere, cleaning every few months is recommended. Locations such as industrial parks or inner-city installations may require more frequent cleaning as the air quality will affect the cleanliness of the letters. Never clean plastic or laminate letters with any harsh detergent or chemicals, as this will dull (matte) the finish.

### **This Important Notice of Purchaser Applies to all LETTERSANDSIGNS.COM Products**

*The following warranty is in lieu of all warranties expresses or implied, Seller and Manufacturer disclaims any warranty of merchant-ability or of fitness for a particular purpose and manufacturer/sellers only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for his or her intended use and user assumes all risk and liability whatsoever in connection therewith. The foregoing may not be altered except by an agreement signed by officers of seller and manufacturer.*
